

# ESD- women's and men's shoes

## with natural cork insole

The CANESPA® sole is naturally adapted to the anatomy of the foot and distributes the pressure points equally over the whole sole of the foot. Thus, the foot receives optimum support during the rolling movement. Only high-quality materials, such as the finest cork latex mixture and especially moisture-absorbing jute as well as outstanding velour leather outer soles, are used for the bio natural form sole. This increases the product life immensely which is surpassing anyway.
